

## READ THIS FIRST

Welcome to Structural Geology 1. The course comprises 10 lectures and 10 practicals designed to increase your knowledge sequentially.

You should copy all the files into one folder on your computer. In this way all the links between lectures and practicals will work.

We suggest that you view the files in Full Screen mode accessible from the View menu in Acrobat Reader. However, you may at times wish to view the thumbnails to the pages, again using the appropriate button in Acrobat Reader. There are many different options and features available in Acrobat Reader - spend some time familiarising yourself with the software. Click once with your mouse on words highlighted in blue, or on the diagrams, to zoom in on the detail.

Make use of the [electronic library](#) provided by Birkbeck. To access this you will need a password which can be provided by the Library.

Now go to the [lecture/practical plan](#).
